Toilet roll Hammerhead

Materials:

- Toilet roll tube
- Card
- Scissors
- Paint Grey & White
- Black permanent pen
- Draw out on separate card, one large dorsal fin, two pectoral fins, one large Caudal fin

(tail) and a **Cephalofoil** (the hammer shape). You can use the end of the roll as a guide to how wide the tail fin and head need to be.

*Take care with the scissors when making the top and middle slits.

3. Paint the toilet roll, fins and head. Grey and white paint creates the **countershading** used for camouflage.

4. When the paint is dry, slot in all the pieces and use the permanent marker to give your little friend 5 gill slits, eyes and a mouth. Why not add some **Ampullae of Lorenzini**

(electroreceptors) for your new buddy to hunt down those sneaky sting ray. You could create a whole underwater scene!
