	α)	Regular Polygon	Irregular Polygon	E.
	Quadrilateral	D	B, C (e.g. parallelogram, trapezium)	\bigcirc
	Not a Quadrilateral	A	Ε	
)	 b) Accept any correct answer, for example please see table above. Ensure this is written in the correct section. c) Equilateral triangle Accept any correct answer, for example: 			
		an	d/or angles must be different sizes.	
)	 a) No. The rhombus shown is not a regular shape because although the sides are the same length, the interior angles are not all the same size. b) A rhombus must have four sides of the same length. As a result, a square is a type of rhombus and is therefore an example of a regular rhombus. 			
)	a) Accept any correct answe A has at least one right a	•		

b) Accept any correct answer which matches the correct labels given in answer 1a, for example:

2) Teacher to check labels and sorting of polygons.
