

## Science Light Stations

## Observation Grid

<p>Working through each Science Light Station, experiment with the equipment. Observe how light reacts differently in various scenarios, and jot down notes about each one.</p> <p>Think about the following questions:</p> <ul style="list-style-type: none"><li>- What is happening?</li><li>- Why do you think it is happening?</li><li>- How can you change what is happening?</li><li>- Anything else of note?</li></ul>	<p><u>Light bubbles</u></p>	<p><u>Mirrors</u></p>
<p><u>Shadows</u></p>	<p><u>Colour table</u></p>	<p><u>Can you think of any other way of exploring the wonders of light?</u></p>

I can observe how light reacts in different scenarios and note down my findings.
