16th October 2019

Dear Parents/Carers,

As part of our learning in science about the circulatory system, we are going to be carrying out a dissection of an animal heart. Due to the logistics of purchasing specimens and arranging extra support, I cannot confirm when this will take place but it will be sometime on or after the 21st October 2019. The dissections will take place in pairs under the supervision of myself with additional adults supporting each group. Health and safety regulations will be adhered to at all times. This opportunity will enable the children to deepen their understanding of the anatomy of the heart.

If you have any questions or queries about the dissection, please speak to me, either in person or by calling or emailing school, on or before Friday 18th October 2019.

Yours sincerely,

Mr Hancock
Class Teacher
