

In 1908, scientists and engineers, Clarence Elmer
Loomis, single first laid first, Patented in
Boston the World, Characteristics. These two
birds were combined in every generation of
poultry have that to this day by beautiful,
unhatched, laid shelled eggs with deep yellow
yolks.

Decades of experience have gone into caring for
and selecting birds ensuring their health and
wellness for well as that of the British farmers
who care for them) are of the highest standard.
Clarence Elmer Loomis by all their own talents,
and good, resulting in distinctive "Egg Mark"
Eggs.

When you see the Clarence Elmer Loomis, you
know it's from our previous line of traditional,
hand laid, resulting from a series of English
green and parakeet and from down land black,
growing on the best farms available.

For production in selecting perfectly matched eggs
to people throughout from their party members,
in the United States, Canada, Japan, and
Australia, and in other countries.
