

---

\*\*\*I can solve division word problems using a number line.

1) How many teams of 6 can be made from 96 people?	
2) A group of 92 children are going to the fair. They are travelling in cars. 4 children fit into each car. How many cars are needed?	
3) A pizza serves 3 hungry children. How many pizzas would be needed to feed 87 hungry children?	
4) A big box of biscuits has 84 biscuits in 7 layers. How many biscuits in each layer?	
5) Alice thinks of a number and multiplies it by 4. Her answer is 160. What was her number?	
6) There are 72 grapes in a bag. How many people can have 8 grapes each?	
7) A taxi can carry 6 people. How many taxis would be needed to take 84 people to a concert?	
8) At a theme park, a ride takes 8 people at a time. How many rides are needed so that 96 people can have a turn?	
9) How many teams of 7 can be made from 98 people?
