

Pictograms

1. Use the pictogram to complete each statement with the correct vehicle.

| Vehicles  | Number of vehicles  |
|-----------|---|
| Car       |  |
| Bus       |  |
| Van       |  |
| Lorry     |  |
| Motorbike |  |

Key:  = 2 vehicles

- A. We saw 1 more motorbike than \_\_\_\_.
- B. We saw 6 fewer \_\_\_\_ than cars.
- C. We saw twice as many buses as \_\_\_\_.

VF

2. Tick the statements that describe the pictogram correctly.

| Time | Number of people in a gym   |
|------|---|
| 7am  |  |
| 8am  |  |
| 9am  |  |
| 10am |  |

Key:  = 4 people

|    |   |  |
|----|---|--|
| A. | There were less than half as many people at 9am than at 7am.  |  |
| B. | There were 26 people in the gym at 10am.                      |  |
| C. | There were half as many people in the gym at 8am than at 7am. |  |

VF

3. Jade draws a pictogram to show children's favourite drink.

| Drink       | Number of children<br>1 picture = 3 children                                       |
|-------------|--|
| Smoothie    |   |
| Apple juice |  |
| Water       |  |
| Milk        |  |

Twice as many children voted for water, than milk.

Is she correct? Explain your answer.

R

4. Ismail is drawing a pictogram. He knows fewer people bought mixed than salty, but more people bought sweet than toffee. Complete the pictogram showing one of the possibilities.

| Popcorn | Number of tubs sold  |
|---------|--|
| Salty   |   |
| Sweet   |  |
| Toffee  |  |
| Mixed   |  |

Key:  = 10 tubs of popcorn

PS

5. Elijah is trying to work out the key for this pictogram. Each child placed 1 vote and 60 children voted altogether.

| Subject  | Number of children   |
|----------|--|
| Maths    |  |
| Literacy |  |
| Science  |  |
| Music    |  |

Key:  = \_\_ children

He thinks the key could be 10 children. Is he correct? Convince me.

R

## Pictograms

1. A. lorries; B. buses; C. vans
2. A and B
3. Jade is incorrect. 18 children voted for milk and twice as many would be 36. Only 27 children voted for water.
4. Various answers, for example: Sweet 70; Mixed 30

| Popcorn | Number of tubs sold   |
|---------|---|
| Salty   |        |
| Sweet   |         |
| Toffee  |         |
| Mixed   |      |

5. Elijah is incorrect. If each triangle represented 10 children there would be 120 children's votes altogether. There are 60 children's votes altogether and 12 triangles.  $60 \div 12 = 5$ . Therefore the key must be 5 children.
